Re: Huntington Homes Water System (VT0020367) Change of Status

Dear Mr. Webster,

Based on information recently provided to the Drinking Water and Groundwater Protection Division (Division), the Huntington Homes Non-Transient Non-Community Water System (water system), WSID# VT0020367 recently connected to the Crystal Springs public community drinking water system, WSID #VT0005264. Wastewater System and Potable Water Supply Permit #WW-5-0024-1 permitted this connection and the responsible Engineer provided certification on November 30, 2015 for completion of the connection. The Huntington Homes water system has complied with the requirements of Permit #WW-5-0024-1 and is hereby inactivated. The Huntington Homes facility will be regulated as part of the Crystal Springs public community drinking water system from this date forward.

The Huntington Homes facility must continue to comply with the conditions set forth in Permit #WW-5-0024-1. Should there come a time when the source well formerly serving the facility is needed to provide water for human consumption, the facility must contact the Division in order to re-activate the system and/or identify the required water quality sampling needed prior to serving water.

Should you have any questions or require additional information, please feel free to contact me at the address above, by phone at 802-498-8981 or by email at ben.montross@vermont.gov.

Sincerely,

Ben Montross
Compliance and Support Services Section Chief
