Minutes

Rural Road Vegetation Assessment Project Committee Meeting

April 17, 2019

Attending: Jeff Cueto, Jean Vissering, Paul Cate, Ken Feld, Jack Pauly, Mark Lane

Also Attending: from CVRPC: Jonathan DeLaBruere, Dan Currier; Chris Reed, Teresa Doyle

Meeting Opened 3:05

The training for the ash survey was scheduled on Saturday May 11, 1:00-4:00 at the Four Corners School provided it is available and an internet connection is sufficient to run the ash inventory data base program. Chris Reed will contact Rachael Grossman to confirm. Part of the training will be outdoors.

Jeff passed out time sheets on which volunteers and staff should record hours invested in the project.

The group reviewed maps from the Resilient Right-of-Ways report showing areas of ash concentration along roads targeted in that report. Jeff suggested that members of the group check roads not surveyed to ensure that volunteers inventory areas with known ash concentrations. Members of the group signed up to do sections of gravel roads. They will get this information to Jeff by early next week.

Jean suggested that volunteers be allowed to choose areas they would like to survey within the targeted segments of roadways.

Dan Currier offered to make a map for reference with 911 data and with road names. Jonathan will arrange to bring extra iPads to the training. He recommended bringing some bright yellow or orange vests to wear while along roadsides.

Jean will provide refreshments for the meeting and will post notices on Front Porch Forum. She will keep a list of volunteers.

A meeting for May 8 at 3:00 was scheduled for advance planning of the May 11 meeting. That meeting will be held at the Town Office.

Meeting adjourned at 3:50

Recorded by Jean Vissering
