| Description | Amount |
|---|-----------|
| This quote is to furnish and install a new Mitsubishi mini-split system at the town offices. There will be a model MXZ4C36NAHZ outdoor unit installed outside by the electrical meters. There will be a bracket installed on the wall to hold the unit up off the ground. There will be four wall units installed inside as follows a model MSZGL12NA installed on the side wall behind the town clerk, there will be another MSZGL12NA installed just above the existing air conditioner in the meeting room. There will be a model MSZGL06 installed in each of the two back offices. Each of the units inside will be piped through the outside wall and then into the basement where they will be hooked to a distribution box. The outside unit will also be piped inside to the distribution box. Any lines that are run outside will be covered in line hide to make them look better. We will wire the inside units to the outside unit and I will expect that you will have your electrician wire the outside unit. The refrigeration lines will be pressure tested and triple evacuated to make sure there are no leaks or air in the system. The proper amount of refrigerant will be added to the system and everything tested for proper operation. These units will both cool and will also produce heat down to -15F outside temperature. Total installed price is \$11,950.00 | 11,950.00 |

| | |
|-------------------------|------------|
| Total | |
| Downpayment | \$5,975.00 |
| Total Due on Completion | \$5,975.00 |

This estimate is good for 30 days.
 Thank you for your business.
