

Hi Zach and Planning Committee,

I have returned to our family farm in East Montpelier and would love to contribute my skills, expertise, network and passion for community development to this committee.

My background is in green real estate and sustainable development. I am a serial entrepreneur and committed to working with fellow committee members to address key issues, foster community engagement and help our community thrive within planetary limits. I have a daughter at St. Andrews in Scotland and a son at Brown in Providence. They have both given me marching orders to help make our community enticing for young people so they may move back here and convince their friends to join them as well.

Please let me know what you need from me. I look forward to discussing how I may contribute to the important work of the committee.

Thank you,
Celina Moore Barton
