

East Montpelier Road Erosion Inventory Report

During the summer of 2025 CVRPC planning technicians inventoried all 395 identified hydrologically connected segments within the town. Of those only 5 received a score of Does not meet the current standards and 35 with a partially meets rating. In the original inventory 228 segments were listed as non-compliant requiring improvement. With the updated inventory this number has dropped significantly to 44 segments that will need improvement by 12/31/2036.
